Venkatasubban, A., Law Bookellers, Vellore.
Wheeler & Co., Allahabad, Calcutta and Bombay, Messrs, A. E.
Young Man & Co., Ajmer and Egerton Road, Delhi.

* Agents for publications on Aviation only.

PREFACE.

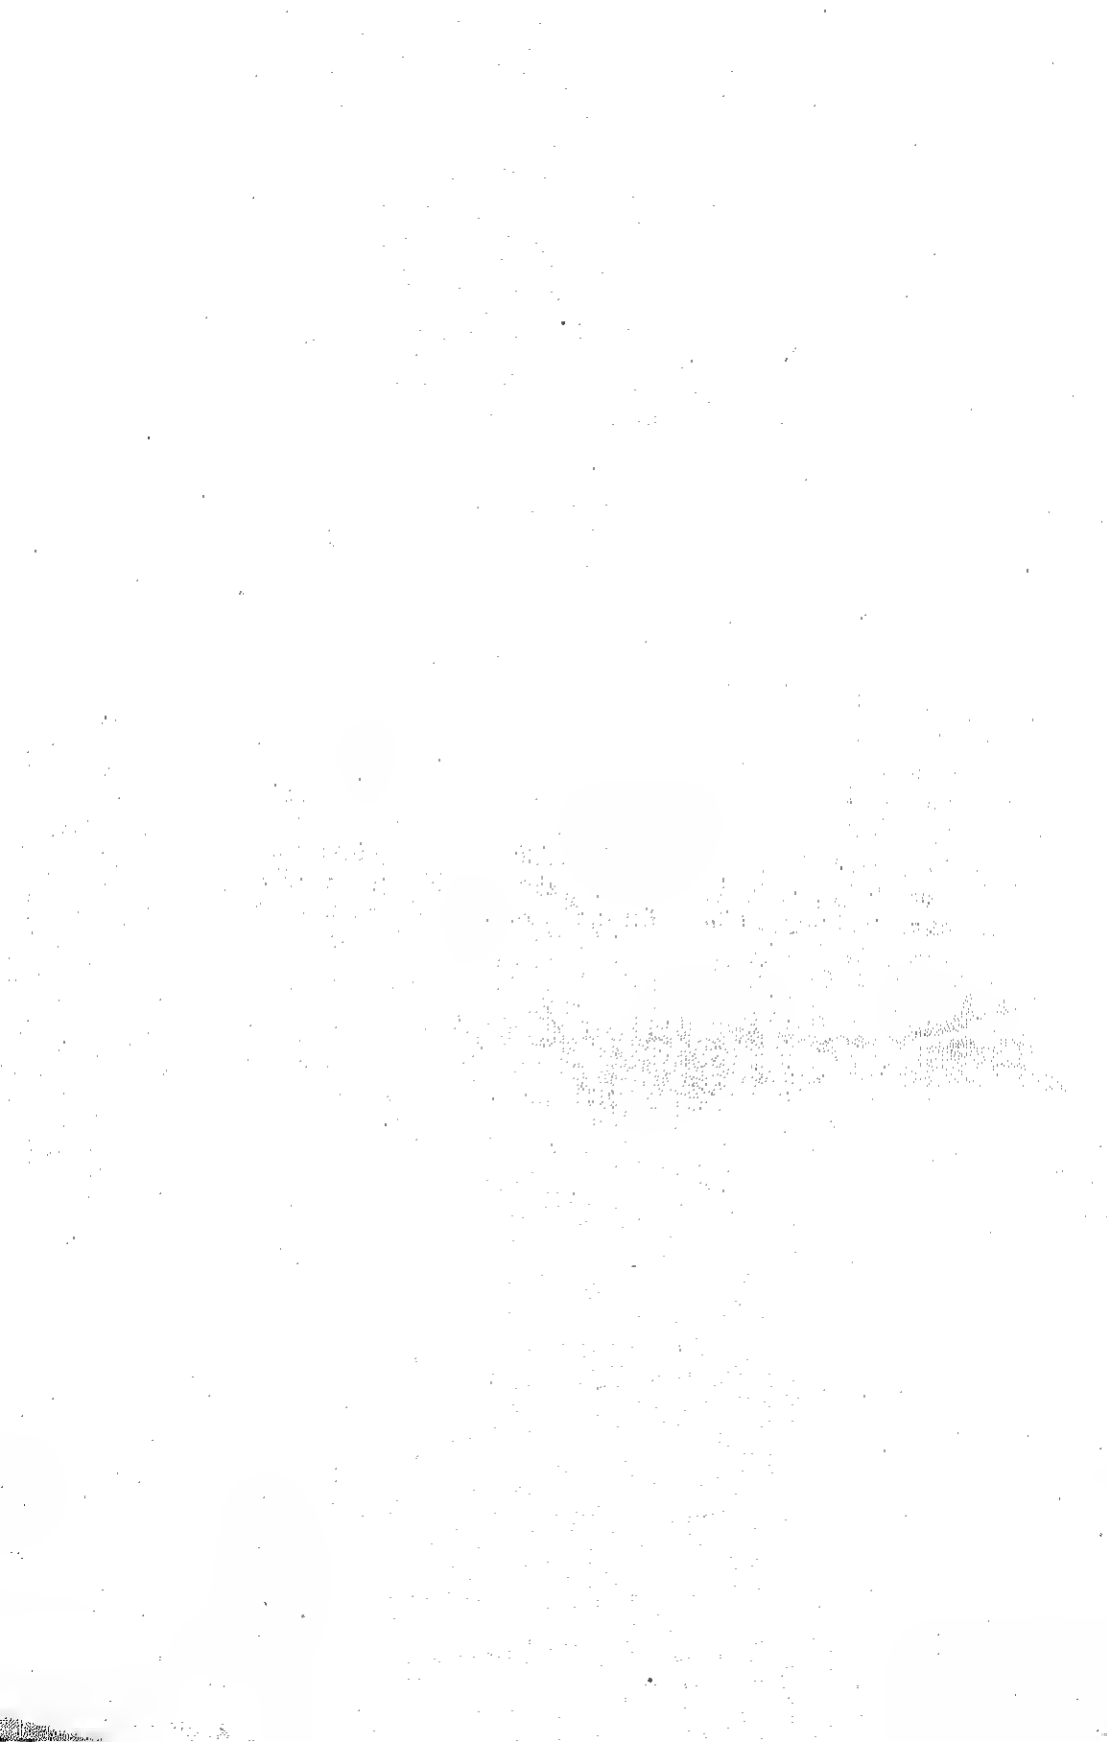

This catalogue is mainly intended for use in the department, though it may prove useful also to other scientific departments and institutions in India. Since observational data are of great importance in meteorology, not only scientific journals, but all periodical publications of data, as well as weather charts, have been listed; series of observations referring to a number of consecutive years, even if published in a single volume, have also been treated as periodicals.

The catalogue includes the holdings of the libraries at the several offices and observatories of the department, and not only that at the head office in Poona.

Though much care has been taken in the preparation of this catalogue, some imperfections, that cannot be avoided in the first edition of such catalogues, may be expected. It is intended to correct these, when noticed, as well as to keep the catalogue up to date, by the issue of supplements.

For the form adopted acknowledgment is due to the model first used by the Manchester Literary and Philosophical Society and introduced in India by the Asiatic Society of Bengal.

The completion of the catalogue is mainly due to the interest taken in the work by Mr. C. P. Menzies, the Assistant in charge of the library, who was assisted by the Library Clerk, Mr. S. Venkataraman.

INDEX

NOTE ON THE ARRANGEMENT.

As will be seen from the table of contents, the arrangement of this catalogue of periodicals is geographical—by continents, countries, towns.

Periodicals issued by an institution are first entered, in alphabetical order if several, under the name of the institution, and the latter is then listed under the town where it is established. When an institution has no definite location, *i.e.*, has no location in a particular town (*viz.*, some American and German societies), it is entered under the place of publication of its periodicals. Independent periodicals, *i.e.*, those which are not issued under the name of any scientific institution, are listed under the towns where they are published.

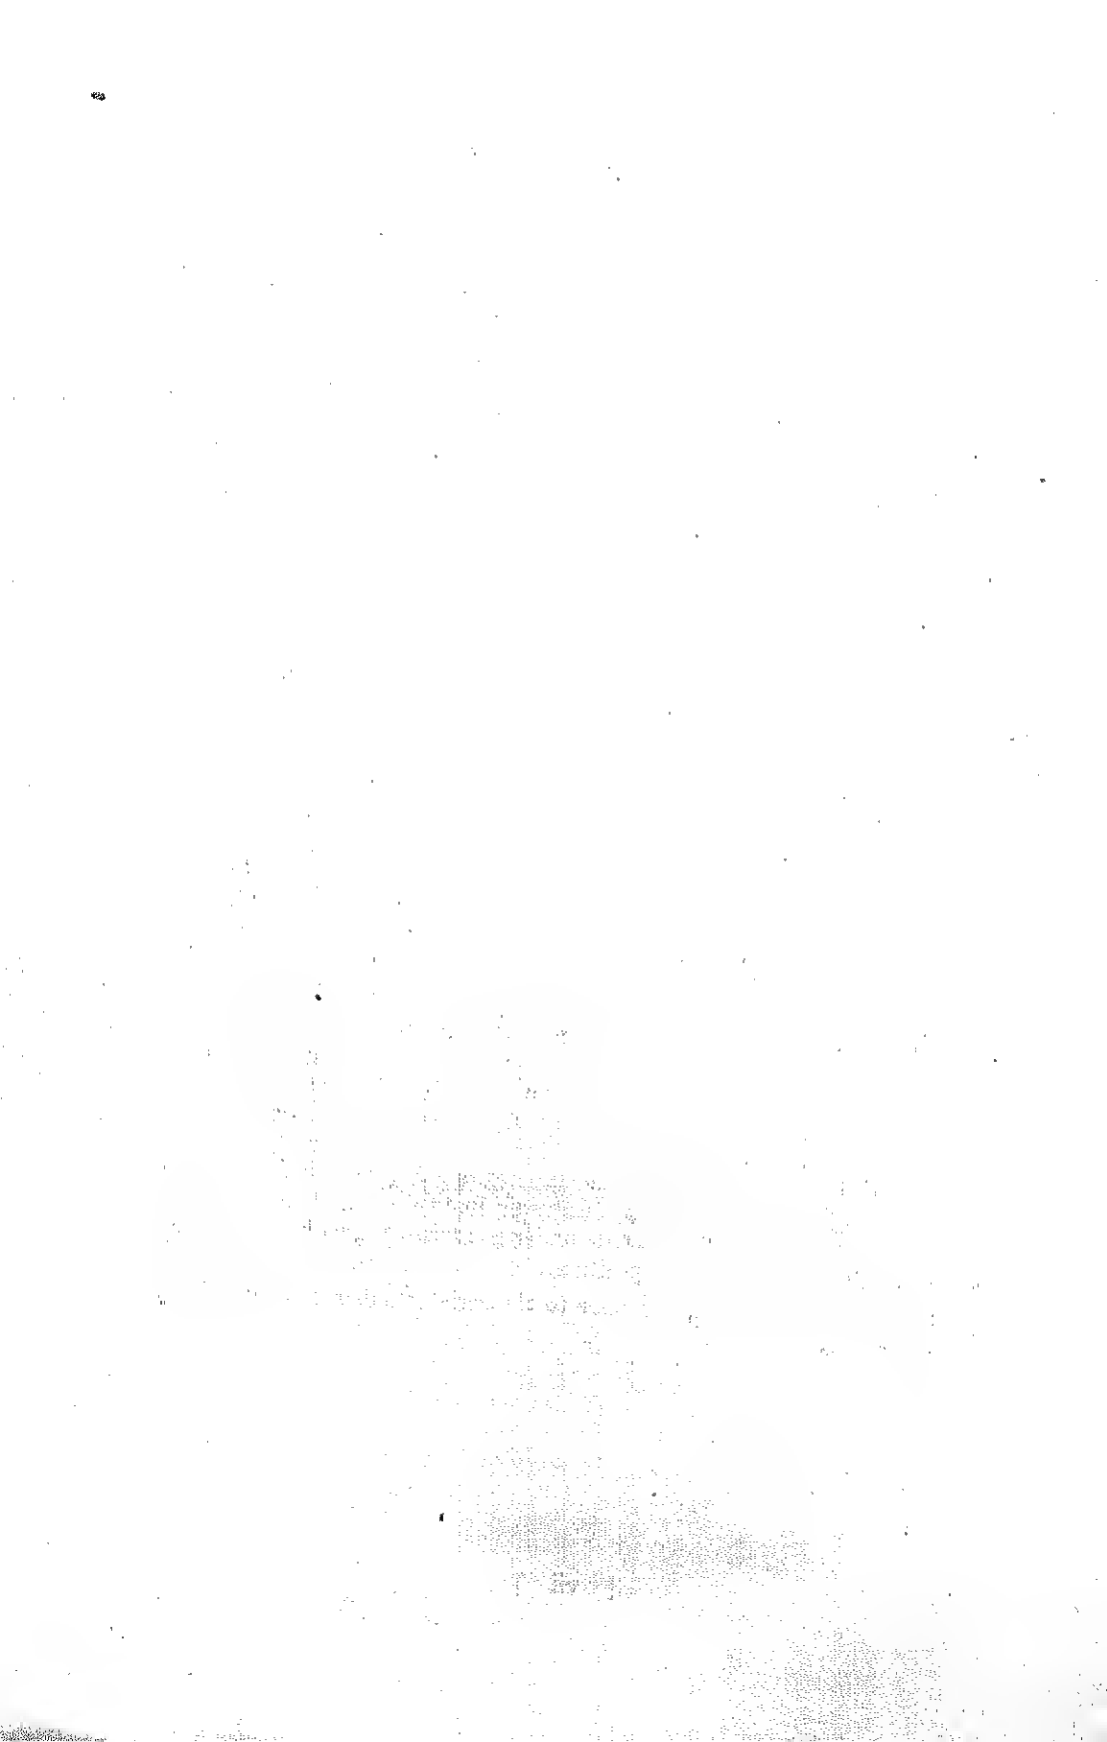

Under each town, the several independent periodicals and the various institutions catalogued under it are ordered in alphabetical sequence. Towns are then arranged alphabetically under countries, and the latter, again alphabetically, under the usual divisions of the globe. International publications are listed in a separate section at the end.

The holdings of each periodical in the different libraries are entered under the title of the periodical, the symbols employed for the libraries being those shown on page ix.

To assist in quick reference an alphabetical index is appended, in which countries, towns, institutions and titles of periodicals are all listed in one alphabetical series. To differentiate the entries, however, each kind of entry is printed in the index in the same type as used for it in the catalogue itself, namely countries in small capitals, towns in Clarendon, institutions in Roman, and titles of periodicals in Italics.

When employing the alphabetical index to trace a periodical or institution, the user should keep in mind the variations in the names of institutions or titles of periodicals that are to be expected and allowed for in such indices. They are usually of the nature of transpositions, like 'Journal of Research. Bureau of Standards—Bureau of Standards. Journal of Research' or 'Carnegie Institution. Astrophysical Observatory—Astrophysical Observatory. Carnegie Institution'. It is expected that the user, failing to trace a title under one form, will look for it under one or other of its likely transpositions.

The numbers in the index refer to the serial number of the entries, not the pages.

LIBRARY SYMBOLS.

P	.	.	.	Poona (Meteorological Office, Poona).
A	.	.	.	Agra (Upper Air Observatory, Agra).
B	.	.	.	Bombay (Colaba Observatory, Bombay).
C	.	.	.	Calcutta (Alipore Observatory and Meteorological Office, Calcutta).
Ka	.	.	.	Karachi (Meteorological Office, Karachi).
Ko	.	.	.	Kodaikanal (Solar Physics Observatory, Kodaikanal).
M	.	.	.	Madras (Meteorological Observatory, Madras).
Pe	.	.	.	Peshawar [Meteorological Office, No. 1, (Indian) Group Headquarters, R. A. F., Peshawar].
Q	.	.	.	Quetta [Meteorological Office, No. 3, (Indian) Wing, R. A. F., Quetta].*

* The files of periodicals in the Library of the Quetta Office, as existing before the earthquake of May 1935, have been shown in this Catalogue. It is expected that the Quetta Office, now temporarily amalgamated with the Karachi Office, will be restored in Quetta in the near future.
